

QHSE Policy

Quality, health, safety and the environment are implemented with a human perspective in all our decisions and actions.

We aim to set the best practices in the industry through continuous improvement, which is based on risk assessment.

We are taking actions:

- to ensure that our customers are satisfied
- to ensure a good and safe working environment in the whole organization
- to motivate, educate and involve our employees in the work of quality, health, safety and environment
- to continuously minimize resource consumption and environmental impacts
- to ensure compliance with legislation and apply recognized norms and standards
- to communicate transparently about targets and results relating to quality, health, safety and the environment.

To ensure, that all processes are always up to date and at the right level, Eltwin operates according to three basic principles: subsidiarity, continuous improvement and timeliness with the commitment of management and all employees.
